VENOME PEEL

Professional use only

VENOME PEEL

PROFESSIONAL TREATMENTS FOR INTENSIVE SKIN RENEWAL

Venome Peel is a professional biological release system skin renewal process at the cellular level. Products from the Venome Peel line prepare the skin for the exfoliate procedure as well as protect it after intense peeling treatment.

Venome Peel line is directed to performing professionals acid treatments who are expecting intensive renewal, without irritation.

Venome Peel are:

- very efficient
- non-invasive
- can be used at any time of the year
- safe for people with sensitive skin

Each preparation contains specially selected ingredients that work without disturbing the outer hydrolipid layer, bringing the effect of exfoliation, cell renewal and regeneration.

Products for professional use only.

VENOME PEEL

THIS IS A PRODUCT LINE THAT ALLOWS YOU TO CARRY OUT A COMPLETE PROCEDURE OF SKIN RENEWAL AND REGENERATION IN 3 STEPS .

REGENERATING CREAM

MOISTURIZING CREAM

EXFOLIATING CREAM

PEEL MANDELIC 50%

MANDELIC ACID
CISTUS MONSPELIENSIS
EXTRACT
PH: 2,6

50 ml

INTENDED USE

Chemical peel with 50% mandelic acid concentration, intended for surface chemical exfoliation of sensitive and skin exposed to pollution. The peel is designed for both acne skin and professional anti-wrinkle care.

EFFECT

Thanks to the specially developed process of crystallization of mandelic acid on the skin's surface, the product has a cleansing and smoothing effect, reducing the visibility of skin pores and fine wrinkles, at the same time helping to remove blackheads. After the treatment, the skin is refreshed, tight and brightened. **The product can be used at any time of the year.**

DIRECTIONS FOR USE

After careful cleansing, degreasing and drying the skin apply a small amount of the product and spread it thoroughly on the face. The product should be gently patted on to the skin with the fingertips to fully crystallize. Rinse with cool water using a cotton pad, until the burning sensation stops completely. Apply serum and moisturizer. Use nitrile gloves during the procedure.

Precautions: Cosmetic product for external use. Do not use on eyelids.

				
TEMPERATURE ROOM	WHOLE YEAR	NON- INVASIVE	SENSITIVE SKIN	25-50 TREATMENTS

PEEL GLYCOLIC 50%

GLYCOLIC ACID
ASCORBIC ACID
PH: 2,8

50 ml

INTENDED USE

Chemical peel, 50% glycolic acid concentration with arginine and antioxidants for anti-wrinkle and anti-ageing, as well as smoothing effect. It is recommended for people prone to premature photo ageing of the skin and local skin discoloration.

EFFECT

It simultaneously disarms free radicals and exfoliates. Purposefully selected active ingredients such as arginine, superoxide dismutase and stable vitamin C make the product strong, yet working without excessive irritation.

DIRECTIONS FOR USE

After careful cleansing, degreasing and drying the skin apply a small amount of the product and massage it into the skin of the face, neck, cleavage, and hands. Leave for 6 to 15 minutes. Wash with a cotton pad using cool water until the burning sensation stops completely. Apply serum and regenerating cream. Use nitrile gloves during the procedure.

Precautions: Cosmetic product for external use. Do not use on eyelids.

					
TEMPERATURE ROOM	RECOMMENDED WITH MESOTHERAPY	WHOLE YEAR	NON- INVASIVE	SENSITIVE SKIN	25-50 TREATMENTS

PEEL SALICYLIC 2%

MANDELIC ACID
SALICYLIC ACID
PH: 2,7

50 ml

INTENDED USE

Anti-acne chemical peeling for cleansing acne-prone skin. The product has exfoliating and antibacterial properties (Propinibacterium Acne and Staphylococcus Aureus).

EFFECT

Cleanses the skin, unblocks skin pores and prevents new ones from forming. Supports the removal of blackheads caused by excessive keratinization through a specially developed technique allowing complete crystallization of the acids. After the treatment, the skin is refreshed, smooth and brightened. **The presence of essential oil from lemon balm reduces the risk of irritation, making the treatment safe for any time of the year.**

DIRECTIONS FOR USE

After careful cleansing, degreasing and drying the skin apply a small amount of the product onto the skin of the face and back. The product should be gently patted onto the skin with the fingertips to fully crystallize. Rinse with cool water until the burning sensation stops completely. Apply serum and regenerating cream. Use nitrile gloves during the procedure.

Precautions: Cosmetic product for external use. Do not use on eyelids.

					
TEMPERATURE ROOM	NOT DURING PREGNANCY	WHOLE YEAR	NON-INVASIVE	SENSITIVE SKIN	25-50 TREATMENTS

PEEL LACTIC 80%

LACTIC ACID
GLUTAMIC ACID
PH: 2,6

50 ml

INTENDED USE

Chemical peel from lactic acid with the complex of natural moisturizing factor (NMF). The peeling is intended for people with visible signs of photo ageing and elastosis (flaccid skin).

EFFECT

It softens and exfoliates making the skin smooth without drying it. It leaves a feeling of pleasantly tight and intensively stimulates the regeneration of the skin. The NMF complex and superoxide dismutase protects against excessive irritation from lactic acid, so it can be used by **people with sensitive skin and at any time of the year.**

DIRECTIONS FOR USE

After carefully washing off the makeup and drying the skin apply a small amount of the product onto the face, neck, décolletage, and hands. Leave on the skin for 6 up to 15 minutes and then rinse with cool water until the burning sensation completely stops.

Precautions: Cosmetic product for external use. Do not use on eyelids.

				
TEMPERATURE ROOM	WHOLE YEAR	NON-INVASIVE	SENSITIVE SKIN	25-50 TREATMENTS

MICELLAR TONIC

MANDELIC ACID 3%
CISTUS MONSPELIENSIS
EXTRACT
CENTELLA ASIATICA EXTRACT
NMF

200 ml

INTENDED USE

Delicate micellar skin toner with almond acid and cistus designed for simultaneous purification and toning of the skin. The product is intended for sensitive skin with a weakened lipid barrier and rosacea tendencies.

EFFECT

The presence of delicate ingredients solubilizing impurities in the form of micelles removes excess of sebum and make-up residues accumulated on the surface of the skin. Because of the use of mandelic acid, NMF complex and plant extracts, the toner simultaneously restores the physiological pH of the epidermis, leaving the skin clean, without disturbing its external hydrolipid layer and irritation.

DIRECTIONS FOR USE

Apply a small amount of the liquid on the cosmetic pad and clean the skin. Apply up to 2 times a day after thorough washing the skin with a gel mixed with water.

			
TEMPERATURE ROOM	WHOLE YEAR	NON- INVASIVE	SENSITIVE SKIN

MICELLAR GEL

MANDELIC ACID 1%
CISTUS MONSPELIENSIS
EXTRACT
NMF

200 ml

INTENDED USE

The product is intended for sensitive skin of eyelids and face with weakened lipid barrier and rosacea tendencies.

EFFECT

Micellar gel with a mild cleansing complex, almond acid and plant extracts, removing make-up residue, excessive amount of sebum and closing skin pores. It does not cause dryness or irritation.

DIRECTIONS FOR USE

Apply a small amount of the product combined with water onto the face and wash it, rinse thoroughly. When removing the make-up, repeat the procedure twice.

			
TEMPERATURE ROOM	WHOLE YEAR	NON- INVASIVE	SENSITIVE SKIN

REGENERATING CREAM

RESVERATROL
ET-VC
UREA 5%
HYDRASALINOL

50 ml

INTENDED USE

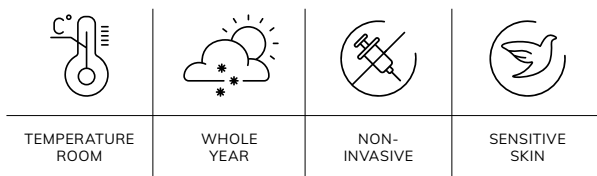

Strongly moisturizing and regenerating cream with antioxidizing properties for demanding skin, exposed to damage caused by free radicals and UV radiation. Inspired by the demands of the skin following laser treatments.

EFFECT

Rich in luscious emollient ingredients such as sweet almond oil and karite butter oil extract. With an innovative liquid crystal base, biocompatible with skin lipids, which maintains the appropriate level of hydration of the epidermis. The formula includes a special composition of antioxidant and moisturizing active ingredients: vitamin C, resveratrol, hydrasalinoland 5% urea, which are necessary to maintain the proper level of hydration of the epidermis during laser treatments. The product is well absorbed, leaving no feeling of oily skin.

DIRECTIONS FOR USE

Massage a small amount of cream (1 drop) into the washed and cleaned skin in the morning and evening.

EXFOLIATING CREAM

POTASSIUM AZELOYL
DIGLYCINATE 15%
VITAMIN C 1%

50 ml

INTENDED USE

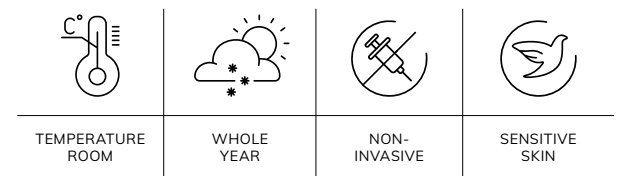

A light cream with delicate exfoliating properties, owed to the concentrated formula containing a unique combination of 15% azeloglycine and stable vitamin C (3-O-Ethyl Ascorbic Acid). The cream has anti-acne properties and brightens the skin with a tendency to post-acne discoloration.

EFFECT

It is based on a light and skin-friendly liquid crystal base consisting of emulsifiers of olive oil, rich avocado oil and skin-restoring karite butter extract. The product has been inspired by chemical peels with azelaic acid, recommended as a non-invasive exfoliant for the epidermis.

DIRECTIONS FOR USE

Use overnight, apply a small amount of the product on washed and cleansed facial skin and leave until completely absorbed. Avoid contact with eyes.

VITAMIN C SERUM

VITAMIN C 20%
SUPEROXIDE
DISMUTASE

30 ml

INTENDED USE

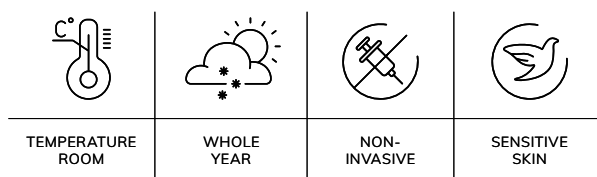

Intensive vitamin serum for facial skin care with a strong antioxidative effect. Recommended for skin exposed to UV radiation, with a prone to irritation caused by professional acid exfoliation and acne treatments with products containing benzoyl peroxide.

EFFECT

Based on the maximal (20%) concentration of an innovative and stable form of vitamin C. The serum is enriched by superoxide dismutase enzyme, which protects our cells against free radicals. The herbal centella and bogbean extracts included in the formula help to soothe the skin and eliminate irritation. The serum has been inspired by regenerative treatments used as a part of protocols employed to reduce the signs of photo-ageing.

DIRECTIONS FOR USE

Apply a small amount of the product on cleansed facial skin and massage in until completely absorbed. Use according to the instructions of a professional.

MOISTURIZING CREAM

5% UREA
NMF
HYDRASALINOL
VITAMIN E 1%

50 ml

INTENDED USE

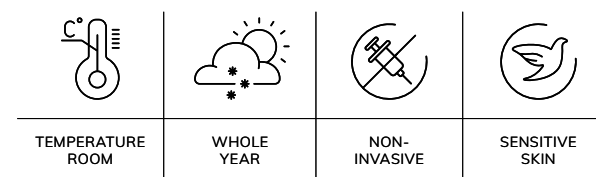

Intensely moisturizing face cream, designed as a moisturizer and supportive skin care following exfoliating treatments with azelaic and glycolic acid, benzoyl peroxide, and retinoids.

EFFECT

Rich in NMF complex (natural moisturizing factor), settled in a delicate liquid crystal base made of lipids derived from vegetable oils: sweet almond and avocado oil, and karite butter. The glasswort extract contained in this intense moisturizing cream prevents the epidermal loss of the urea resulting in dry epidermis. It leaves the skin moist but without an oily layer. The product has been inspired by the moisturizing regimens recommended after the treatments causing the skin to dry.

DIRECTIONS FOR USE

Apply a small amount of the product (1 drop) on facial skin and leave until completely absorbed. Use twice a day.

TREATMENT PROCEDURE

PEEL MANDELIC 50%

RECOMMENDATIONS:

cleansing

refreshing

sensitive skin

rosacea

astringent pores

CONTRAINDICATIONS:

sunburned or compromised skin (mechanical damage, abrasions, erosions, or scratches)

active herpes, fungal infections

during isotretinoin therapy and half a year following the completion of the treatment protocol

allergy to any of the ingredients

POST-TREATMENT RECOMMENDATIONS:

scratching of the flaky epidermal skin must be avoided

sun exposure or solarium should be avoided while skin is healing – from 14 up to 21 days post treatment

the use of products containing ethyl/isopropyl (rubbing) alcohol should be avoided for a couple of days after the treatment

the use of at least SPF 30 sunscreen is recommended

5 min.

ACCESSORIES REQUIRED TO COMPLETE THE TREATMENT:

3 cosmetic bowls: a small one for the chemical peel, a medium one for the water for rinsing, and the biggest one for the waste

pair of nitril gloves, a cap/head band/a gown to cover the skin of the upper body

cosmetic cotton pads, clean towels

optionally: cavitation peeling

TREATMENT PROCEDURE

- MICELLAR GEL CLEANSING AND MAKE-UP REMOVAL**
 - prepare warm water in a medium bowl,
 - wet your hands with the water,
 - apply a small portion of the gel onto your hands,
 - melt the gel with your fingers and then, in circular motions, apply onto the skin of the face and the top of the neck,
 - rinse the skin using warm water –be careful around the eyes, do not let the product get into your eyes,
 - rinse the remainders of the gel using soaking wet cotton pads or a towel,
 - repeat the step if necessary,
 - change the water in the bowl for lukewarm, clean one.

TREATMENT PROCEDURE

PEEL MANDELIC 50%

5 min.

2. MICELLAR TONIC TONING THE SKIN

- pour about 1ml of the product onto a cotton pad and additionally wet it with the water from the bowl,
- optionally, you may do a cavity peel,
- dry the skin using cotton pads.

7 min.

3. PEEL MANDELIC 50% CHEMICAL PEELING

- wear nitril gloves,
- pour about 1 ml of the product into a small bowl,
- soak a cotton pad in the product,
- evenly apply the peel onto the skin using a cotton pad, do not chafe the skin, keep the product away from the eyelids,
- pat the product into the skin using your fingertips until you see the skin has frosted,
- rinse using lots of cold or lukewarm water and cotton pads or a towel,
- keep rinsing until the burning sensation dissipates.

2 min.

4. VITAMIN C SERUM ANTIOXIDATION

- apply 7 drops of the product onto your forehead, cheeks, chin, neck, and décolletage,
- spread evenly and delicately massage into the skin.

3-10 min.

5. REGENERATING CREAM REGENERATION

- gently massage about 1 ml of the product into the skin.

This product can be used for face massage.

5 min.

6. MOISTURIZING CREAM HYDRATION

- delicately rinse off the remainders of previously used products using a cotton pad and water,
- delicately massage the moisturizing cream into the skin.

Finish

Recommended number of treatments:

- contaminated skin: 3 - 5 treatments 1x 2 weeks,
Treatment maintaining the effect of a series of treatments:
1x month.

TREATMENT PROCEDURE

PEEL LACTIC 80%

RECOMMENDATIONS:

moisturizing

reducing wrinkles

for weakened skin

with flaccid epidermis

particularly sensitive skin

with visible photoaging

after laser and radio waves

CONTRAINDICATIONS:

sunburned or compromised skin (mechanical damage, abrasions, erosions, or scratches)

active herpes, fungal infections

during isotretinoin therapy and half a year following the completion of the treatment protocol

allergy to any of the ingredients

POST-TREATMENT RECOMMENDATIONS:

scratching of the flaky epidermal skin must be avoided

sun exposure or solarium should be avoided while skin is healing – from 14 up to 21 days post treatment

the use of products containing ethyl/isopropyl (rubbing) alcohol should be avoided for a couple of days after the treatment

the use of at least SPF 30 sunscreen is recommended

5 min.

ACCESSORIES REQUIRED TO COMPLETE THE TREATMENT:
