VENOME SKIN ANTIDOTE

---

ANTIDOTE FOR YOUR SKIN

# VENOME SKIN ANTIDOTE LIFT

## SMOOTH AND FIRM SKIN

2 ml

### INDICATIONS:

Sagging and lack of elasticity

Dehydrated skin

Expression wrinkles

Locally reddened skin

As follow-up after treatment

### EFFECT

Concentrated LIFT ampoules with their perfect combination of active ingredients leave the skin firm and prevent it from sagging.

The **hexapeptide-8-based** lifting complex has dermo-relaxing properties — it relieves muscular tension and thus reduces the appearance of expression wrinkles. The synthetic peptide also helps regenerate the skin as it makes the epidermal barrier stronger and thus boosts the process of skin recovery. The product also contains hydrolyzed collagen, which ensures your skin is moisturized, toned and firm.

The addition of hygroscopic **Pseudoalteromonas Ferment extract** replenishes water in the stratum corneum, counteracting transepidermal water loss (TEWL).

High concentration of **flavonoid-rich mallow leaf extract** (known for its protective and strengthening properties) has a positive effect on blood vessels: it reduces their permeability and makes their walls stronger, while proteins, tannins, vitamin B1 and vitamin C improve the elasticity of the stratum corneum, boost the activity of antioxidants and rebuild the protective epidermal barrier.

**Arnica Montana flower extract** not only provides relief for irritated skin but also reduces its reddening. With its antiseptic and astringent properties, it also prevents swelling and inflammation.

The product also contains **hyaluronic acid, citric acid** and **glycerin molecules**, which ensure the right level of hydration, and make the skin soft and firm.

### DIRECTIONS FOR USE

Open the ampoule using the included opener. Break the neck at the mark. Apply the content onto the face, neck, and décolletage by gently patting the skin with your fingertips. Leave to absorb, then apply cream suitable for your skin type. Apply in the morning and/or evening over the course of at least several days.

### PRECAUTIONS

Cosmetic product, for external use only. Avoid contact with eyes and mucous membranes. After the application, use SPF 50+ sunscreen. Do not swallow. Keep away from children.

# VENOME SKIN ANTIDOTE HYDRATION

## SUPPLE AND GLOWING SKIN

---

2 ml

### INDICATIONS:

---

Dry and dehydrated skin

---

Couperose skin

---

Sagging and lack of elasticity

---

Skin prone to dryness

---

As follow-up after treatment

---

## EFFECT

---

Long-lasting effects, moisturized and dewy skin owing to a unique combination of **mallow leaf extract** and **hyaluronic acid**.

**Mallow leaf extract** is rich in mucilage — substance responsible for absorbing and binding water. Its unique molecule size helps it remain on the surface of the epidermis, creating a protective occlusive barrier, which significantly boosts skin elasticity and hydration.

The product also contains amino acids such as **cysteine**, **arginine** and **proline**, which are part of the natural moisturizing factor (NMF) and which are responsible for regulating osmotic pressure and thus — the level of skin hydration. Amino acids restore the skin and increase its elasticity, making it less sensitive to adverse environmental factors.

**Vitamin B3** (niacin) reduces the loss of water, keeping the skin hydrated, and also stimulates the production of collagen in fibroblasts. A high concentration of **DMAE** protects cells against harmful free radicals, and makes it firm and toned.

## DIRECTIONS FOR USE

---

Open the ampoule using the included opener. Break the neck at the mark. Apply the content onto the face, neck, and décolletage by gently patting the skin with your fingertips. Leave to absorb, then apply cream suitable for your skin type. Apply in the morning and/or evening over the course of at least several days.

## PRECAUTIONS

---

Cosmetic product, for external use only. Avoid contact with eyes and mucous membranes. After the application, use SPF 50+ sunscreen. Do not swallow. Keep away from children.

# VENOME SKIN ANTIDOTE GLOW

## GLOWING, SMOOTH AND FRESH SKIN

2 ml

### INDICATIONS:

Dull skin

Hyperpigmentation and melasma

To complement treatments involving exfoliating acids or acids which can be used year-round

Sagging and pasty skin

As follow-up after treatment

## EFFECT

The GLOW serum is a unique combination of **antioxidants** and **skin brightening ingredients**.

**Ascorbyl glucoside** contained in the ampoules is a combination of a **vitamin C-derivative** with one molecule of **glucose**. It can penetrate into deeper layers of skin, which means it has the power to effectively brighten discolorations and protect collagen and elastin fibers against destructive free radicals.

**Tranexamic acid** helps suppress excessive local melanin secretion, minimizing the risk of discolorations in the future. It also strengthens blood vessels, preventing the skin from red-ening and reducing the risk of developing spider veins.

**Arbutin** suppresses melanin synthesis by reducing the activity of tyrosinase and thus helps decrease hyperpigmentation. **Oligopeptide-34** protects skin cells against aging and boosts the production of new collagen and elastin fibers.

A high concentration of **succinic acid** helps reduce the number of free radicals and stop inflammatory reactions, which can contribute to the emergence of new dark spots.

## DIRECTIONS FOR USE

Open the ampoule using the included opener. Break the neck at the mark. Apply the content onto the face, neck, and décolletage by gently patting the skin with your fingertips. Leave to absorb, then apply cream suitable for your skin type. Apply in the morning and/or evening over the course of at least several days.

## PRECAUTIONS

Cosmetic product, for external use only. Avoid contact with eyes and mucous membranes. After the application, use SPF 50+ sunscreen. Do not swallow. Keep away from children.
