VENOME COMPONENT

---

Professional use only

venome

**COMBINE  
AS INDICATED**

**VENOME COMPONENT**

# VENOME COMPONENT

Venome mesotherapy components are a range of 8 sterile products available in 10 ml vials. The high concentration of active ingredients gives you the option to mix them in the chosen proportions, which means you can use a unique mesococktail in a customized treatment protocol adjusted to the specific needs of your demanding patients. All Venome components can be also used to boost the effects of the Meso range ampoules. The products are dedicated to professional use for in-office treatments.

In the Venome Components range you will find semi-finished products, which, when used alone or in combination, will allow completely solve or reduce problems such as:

SKIN  
FLACCIDITY

FINE AND  
THINNING HAIR

CELLULITE

WRINKLES

DISCOLORATIONS AND  
HYPERPIGMENTATION

FAT  
DEPOSITS

STRETCH MARKS  
AND SCARS

EXCESSIVE SEBUM  
PRODUCTION

DRY AND  
DULL SKIN

TIRED AND  
DEHYDRATED SKIN

# VENOME COMPONENT BIOTIN

10 x 10 ml

## INDICATIONS

- Weak and brittle hair
- Hair loss
- Dull skin
- Skin dehydration
- Inflammation
- Excessive sebum production

## EFFECTS

**BIOTIN** — biotin, also known as vitamin B7 or vitamin H, is a water-soluble organic compound; one of the B vitamins. It is involved in a wide range of metabolic processes occurring in our bodies, such as the production of fatty acids, blood coagulation, and amino acid synthesis. Biotin deficiency impairs the catalysis of selected reactions. Deficiency symptoms include brittle and thinning hair, dull skin, inflammation, severe skin dehydration and atopy.

Biotin mesotherapy treatment can solve the problem of brittle and weak hair thanks to the sulfur atoms contained in the structure of this vitamin, which are used to form keratin — a protein that makes up human hair. Biotin strengthens hair, improves its condition and helps make hair matrix stronger. Improper function of sebaceous glands can result in skin impurities and suppurative inflammation — vitamin B7 applied on skin restores their proper functioning.

# VENOME COMPONENT DMAE

10 x 10 ml

## INDICATIONS

- Skin flaccidity
- Loss of skin density
- Visible lines and wrinkles

## EFFECTS

**DMAE** (dimethylethanolamine) is an organic compound. In the human body, it is a precursor of acetylcholine, a neurotransmitter responsible for stimulating nerve endings in muscles, leading to their contraction. Increased muscle tension provides support for loose skin, tightening it and reducing fine lines.

DMAE component stimulates fibroblasts to work with a greater intensity, increasing the number of protein fibers and improving skin condition.

# VENOME COMPONENT DMAE & SILICIUM

10 x 10 ml

## INDICATIONS

- Loss of skin elasticity on face, neck and décolletage
- Skin flaccidity on thighs, arms and stomach

## EFFECTS

**DMAE + SILICON** — the combination of DMAE and silicon helps increase skin density, providing substances required for collagen fiber formation. Dimethylethanolamine's ability to stimulate the secretion of acetylcholine helps tighten the skin.

This unique dual component effectively regenerates the skin, increasing its density and elasticity and providing support through improved muscle tone, which enhances the natural facial contour. The product has anti-oxidative and anti-inflammatory properties and helps boost skin regeneration.

# VENOME COMPONENT SILICIUM

10 x 10 ml

## INDICATIONS

- Weak and brittle hair
- Hair loss
- Dry skin
- Flaccidity
- Expression lines

## EFFECTS

**SILICON** — organic silicon is a microelement sometimes referred to as “the element of life”, as it is involved in many metabolic processes in the human body. It plays a significant role in the formation of connective tissue, as it is its structural component. It strengthens blood vessels, ensuring the right level of permeability and flexibility. It is also involved in the formation of collagen fibers. The component effectively limits hair loss and accelerates the growth of new hair by providing the right building material.

The organic silicon derivative used in the product, rich in mannuronic acid, not only regenerates and restores the skin, but also protects it against the loss of firmness. The mesotherapy component also demonstrates strong regenerating and anti-inflammatory properties. It counteracts acne and reduces the problem of dry and loose skin.

# VENOME COMPONENT VITAMIN C 20%

10 x 10 ml

## INDICATIONS

- Flaccid and loose skin
- Dark spots and hyperpigmentation
- Excessive sun exposure
- Erythema and visible blood vessels
- Dull, tired and grayish skin

## EFFECTS

**VITAMIN C** — ascorbic acid is a water-soluble vitamin which demonstrates exceptionally high biological activity. In combination with enzymes, it catalyzes specific chemical reactions occurring in the body. It is involved in the synthesis of collagen and elastin — two of the most important structural substances in the skin.

**Vitamin C** has strong antioxidant properties. It reduces the number of free oxygen radicals (oxidative stress) which damage the structure of lipids, proteins and DNA.

In combination with **vitamin E**, ascorbic acid protects the skin against UV radiation. It suppresses the activity of metalloproteinase-1, which damages collagen fibers and accelerates skin aging.

Vitamin C has a beneficial effect on blood vessels and microcirculation, thus reducing erythema. The high vitamin C concentration in our product helps brighten dark spots and reduce hyperpigmentation resulting from intense sun exposure or inflammation.

# VENOME COMPONENT RETINOL 300

10 x 10 ml

## INDICATIONS

- Dark spots and hyperpigmentation
- Flaccid skin
- Minor inflammatory lesions
- Excessive keratinization of the epidermis
- Stretch marks and scars

## EFFECTS

**RETINOL 300** — due to its ability to stimulate fibroblast division and the production of scleroproteins, pure vitamin A is used to effectively regenerate and rejuvenate skin. Retinol positively affects the differentiation and division of epidermis cells, accelerating keratinization and thickening its living layers. As a result, the dermis lying below is better protected against external factors. Retinol helps restore healthy skin texture and the right level of hydration by counteracting transepidermal water loss.

**Vitamin A** modulates the activity of melanocytes, which effectively eliminates hyperpigmentation and minor dark spots. Vitamin A helps sebaceous glands work properly and reduces inflammation — which is why it is recommended in acne-prone, oily, and combination skin care regimens.

# VENOME COMPONENT ARTICHOKE

10 x 10 ml

## INDICATIONS

- Water retention
- Edema and swelling
- Compact cellulite

## EFFECTS

**ARTICHOKE** — artichoke extract actively reduces compact cellulite and edema, as it boosts draining, counteracts swelling and accelerates microcirculation. As a result, it effectively eliminates excessive water retention in tissues.

The extract also includes **vitamins A, C and E**, all demonstrating anti-oxidant and detoxifying properties.

Artichokes are also rich in **cynarine**, a polyphenol which contributes to faster glucose and lipid metabolism. The mesotherapy product containing artichoke extract perfectly supports and complements treatments targeting fat deposits.

# VENOME COMPONENT PHOSPHATIDYLCHOLINE

10 x 10 ml

## INDICATIONS

- Localized fat deposits
- Double chin
- Soft and compact cellulite

## EFFECTS

**PHOSPHATIDYLCHOLINE** — an organic compound also referred to as lecithin, which belongs to the phospholipid group; a major component of biological membranes in living organisms. In humans, it supports liver function, and improves memory and concentration.

Phosphatidylcholine also actively supports lipolysis owing to its ability to activate **PPAR gamma receptors**, which synthesize glucose and fats, breaking them down into smaller particles, which means they can escape from adipocytes and be synthesized in the liver.

# MIX IT UP!

All the Venome components can be used on their own or mixed together in the right ways to obtain a customized product for your patient's requirements and needs.

## BODY PROTOCOLS

### 1. PHOSPHATIDYLCHOLINE + ARTICHOKE 3 ML + 1 ML

Tackle stubborn fat and double chin

### 2. ARTICHOKE + DMAE & SILICUM 2 ML + 3 ML

Eliminate cellulite and restore skin firmness

### 3. DMAE + RETINOL 300 3 ML + 2 ML

Minimize stretch marks and restore skin density

### 4. SILICUM + ARTICHOKE 2 ML + 3 ML

Eliminate water retention and edema

### 5. VITAMIN C + ARTICHOKE + SILICUM 1 ML + 2 ML + 2 ML

Strengthen blood vessels and reduce swelling

### 6. VITAMIN C + DMAE & SILICUM 1 ML + 3 ML

Restore skin density on the neck, décolletage and thighs

## HAIR PROTOCOL

### 1. BIOTIN + SILICUM 2 ML + 2 ML

Reduce hair loss and eliminate vitamin deficiencies

# MIX IT UP!

## FACIAL SKIN PROTOCOLS

**1. VITAMIN C + BIOTIN**  
**2 ML + 2 ML**

Brighten and regenerate the skin

**2. VITAMIN C**  
**+ DMAE & SILICIUM 3 ML + 1 ML**

Eliminate discolorations and restore skin density

**3. RETINOL 300 + VITAMIN C**  
**2 ML + 1 ML**

Reduce wrinkles, deeply nourish the skin, and heal inflammation

**4. BIOTIN + SILICIUM**  
**2 ML + 2 ML**

Regenerate and hydrate the skin

Professional use only
