VENOME PRODUCTS CATALOG

VENOME IS THE ART OF BEAUTY.

**A POLISH TEAM. ITALIAN, GERMAN, SPANISH,
AND POLISH LABORATORIES.**

**INNOVATIVE CONCEPTS COMBINED IN A TIMELESS APPROACH
TO AESTHETICS AND SKINCARE.**

Venome

was created leveraging ten years of experience in the aesthetic business. Thousands of clients and the multitude of solutions offered by the market — most of them ignoring the real needs of practitioners and patients — are what motivated us to create tailor-made products that best match the most common aesthetic problems.

LITERALLY.

The idea behind the Venome brand, which we always communicate to professionals, involves a personalized approach and deep analysis to minimize the causes and consistently eliminate the problem using the right products from the following ranges:

**VENOME
MESO**

**VENOME
STIMULATE**

**VENOME
AUTOLOGIC**

**VENOME
FILLER**

**VENOME
FILLER
LIDOCAINE**

**VENOME
TRYCHO**

**VENOME
PEEL**

**VENOME
SUCCINATE**

**VENOME
LIPO**

**VENOME
COSMECEUTICALS**

Each Venome product is designed to solve a specific problem and help both practitioners and patients achieve success.

CHOOSE A COMPLETE THERAPY.

CHOOSE VENOME.

MESO

Venome Meso is a range of **13 sterile** mesotherapy preparations rich in active substances targeted for the needs of various types of skin: acne, atopic, prone to wrinkles, to hair and body products and extremely delicate intimate zones. Active ingredients each of the mesococktails have been specially selected in terms of specific areas of the skin and their individual needs. The preparations are intended for professionals performing treatments in the office.

VENOME MESO ANTIAGE 5ML **REDUCTION OF SIGNS OF PHOTO-AGING**

Vitamin cocktail to help combat signs of photoaging of the skin. Essential for stimulating tissue renewal, especially after periods of exposure to adverse UV radiation.

VENOME MESO ACNE 5 ML **SUPPORT FOR CONDITIONED SKIN INFLAMMATORY AND ACNE**

Two fungal extracts: Cordyceps and Variegated Ingross, have created an ideal ampoule in the fight against skin inflammation.

The active ingredients of the preparation also have a strong anti-inflammatory and antibacterial effect, minimizing the formation of subsequent inflammations.

VENOME MESO ATOPIC 5ML **INCREASE OF ILLUMINATION AND BARRIERS PROTECTIVE SKIN PREENERED**

Meso ATOPIC helps rebuild the skin's protective barrier. The ATOPIC mesococktail is characterized by a combination of antioxidants and active forms of vitamin C, demonstrating anti-inflammatory and stimulating effects.

VENOME MESO ANTIOX 5ML

ANTIOXIDANT SHIELD WHICH HELP IN THE FIGHT AGAINST DISCOLOURATION AND VISIBLE SIGNS OF AGING

It contains a unique combination of active ingredients supporting skin repair processes and rebuilding the protective barrier, useful in the fight against free radicals.

VENOME MESO DELICATE WHITE 5ML

ANTIOXIDANT SHIELD HELPFUL IN FIGHTING DISCOLORATION

A unique set of active ingredients designed to work in areas where the skin requires special care.

VENOME MESO DELICATE FIRM 5ML

BIO-REVITALIZATION OF SENSITIVE INTIMATE AREAS

A mesococktail designed for particularly sensitive areas, which thanks to the high concentration of hyaluronic acid and DMAE makes it more elastic and restores the proper moisture level.

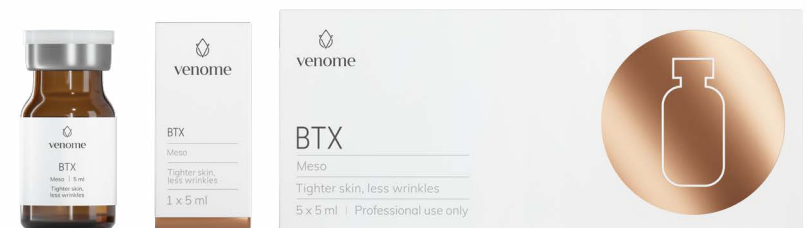

VENOME MESO BTX 5ML

ELIMINATING WRINKLES THANKS TO THE BOTOX-LIKE EFFECT

A unique formula supporting the reconstruction of collagen fibers, thereby increasing the density and tension of the skin.

Due to its composition, Meso BTX is one of the most effective therapies responsible for strong anti-wrinkle and repair effects.

VENOME MESO EYEBAG 2ML

HELP IN THE FIGHT AGAINST SWELLING IN THE EYE AREA

Edema located around the eyes require carefully selected ingredients for their complete elimination.

Meso EYEBAG has a unique composition, thanks to which water stagnations occurring in the tear valley zone are minimized.

VENOME MESO HANDS 5ML

INTENSIVE REGENERATION AND HAND CARE

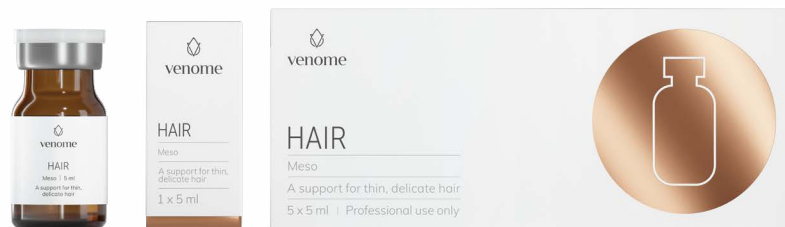

The delicate skin of the hands, constantly exposed to external factors, requires adequate moisturizing and supplying ingredients with the ability to activate regenerative functions in tissues.

VENOME MESO HAIR 5ML

HELP FOR WEAK AND DELICATE HAIR ROOTS

Meso HAIR is the perfect composition to strengthen weak and delicate hair.

VENOME MESO NECK 5ML

BIO-RENEWAL OF THE NECK AND NECKLINE

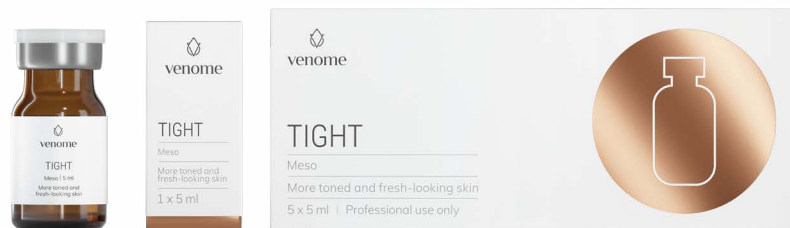

Meso NECK is a highly effective cocktail of active ingredients that provide regeneration and improvement of the appearance of the neck skin.

VENOME MESO TIGHT 5ML

THE EFFECT OF TENSION AND STIMULATION OF DEEP SKIN REGENERATION

The active ingredients contained in Meso TIGHT mesococktail effectively regenerate skin structure, giving the effect of restoring skin density and tension.

VENOME MESO ANTICELLULITE 5ML

CELLULITE REDUCTION

Specially selected ingredients of the preparation, such as: Caffeine, L-carnitine and extract from artichoke and field horsetail, synergistically work together in the fight against cellulite.

STIMULATE

Venome Stimulate is a range of **3 products** with stimulating and regenerating properties. The active ingredients of the preparations are highly concentrated, which makes the treatments extremely effective.

VENOME STIMULATE PEPTIDES COMPLEX 5ML HIGHLY CONCENTRATED ANTI-WRINKLES FORMULA

Venome Stimulate Peptides Complex is a revitalizing product with an advanced formula containing four peptides which directly help inhibit the transmission of electrical impulses to the muscles by neurotransmitters.

They suppress muscular contractions and thus smooth out fine lines, which are the result of repeated use of facial muscles.

VENOME STIMULATE COLLAGEN 5ML EFFECTIVE SKIN REGENERATION

Tetrapeptid-2, an active peptide that increases firmness and elasticity, thanks to the stimulation of the production of one of the main skin components - collagen. It eliminates the elastose formed with age, reducing the number of wrinkles and the density of wrinkles.

Hydrolyzed collagen, the active ingredient that improves skin structure by replenishing structural protein deficiencies and increasing hydration. Helps reduce wrinkles, stretch marks and scars. Sodium hyaluronate, a substance that maintains proper hydration of the skin due to its strong hygroscopic (water-binding) properties.

VENOME STIMULATE BOOSTER HA 6% 5 ML HIGH-HYDRATION

Venome Stimulate Booster is a product containing Hyaluronan Sodium. It is a product with strong hygroscopic properties, making it one of the most effective ingredients to moisturize the skin and prevent excessive loss of water from its surface.

Helps to maintain the stability of structural proteins: collagen and elastin, thanks to which it improves tension and elasticity, ensuring thus a youthful appearance.

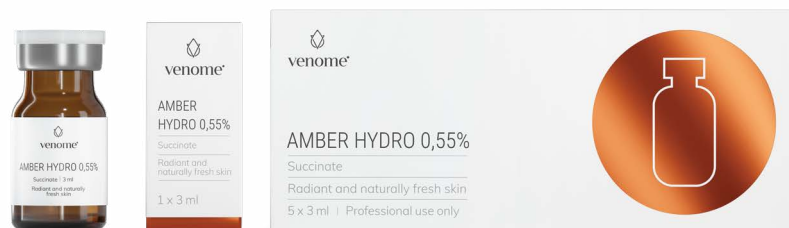

SUCCINATE

Range of products with unique combinations of hyaluronic acid and succinic acid with different concentrations.

VENOME AMBER HYDRO 0,55% 3ML **RADIANT AND NATURALLY FRESH SKIN**

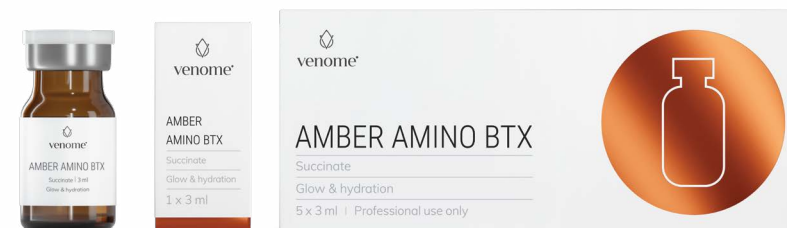

Venome Succinate Amber Hydro is a revitalizing treatment, which supplies the cells with the nutrients vital for their proper functioning.

A unique combination of succinic acid (1%) and non-reticulated hyaluronic acid (0.55%) helps improve skin quality and texture, significantly increases the level of hydration and minimizes the number of free radicals that damage lipids and proteins (including collagen and elastin fibers) as well as accelerate cell death.

VENOME AMBER AMINO BTX 3ML **BOOST AND REVITALIZATION OF SKIN STRUCTURES**

Venome Succinate Amber Amino BTX is a stimulating treatment with an extremely advanced formula: a unique combination of succinic and hyaluronic acids, amino acids, and a peptide complex, which helps increase the skin's regenerative potential and stimulate fibroblasts to produce structural fibers and extracellular matrix. The composition of the product prevents the formation of expression lines and wrinkles which appear as a result of muscle overexpression.

VENOME AMBER SAFFRON+ 3ML **INTENSIVE RENEWAL, REDUCTION OF DISCOLORATION AND SKIN ILLUMINATION**

Venome Amber Saffron+ is an innovative skin stimulating treatment with great brightening potential, which effectively boosts natural renewal processes in the skin, reducing the appearance of dark spots and restoring healthy skin tone.

An innovative combination of 1.5% succinic acid, hyaluronic acid, and saffron extract (Crocus Sativus Extract) allows the skin to rehydrate, at the same time counteracting the activity of free radicals, all of which helps slow down aging processes, thus making it the perfect anti-aging solution. Niacinamide, tranexamic acid, and glutathione contained in the product help minimize dermal discolorations and have strong brightening properties.

VENOME AMBER ROSE PDRN 3ML

Venome Amber Rose PDRN is a unique stimulating and revitalising treatment that, with its advanced formula based on a combination of PDRN (1%), succinic acid (1%) and hyaluronic acid (1%), a peptide complex and rosehip and hibiscus flower extract, activates powerful tissue fibroplasia for the formation of new protein fibres, including type I and III collagen.

The process of fibroplasia involves the reconstruction and repair of damaged tissues through intensive division and multiplication of fibroblasts, responsible for the production of new collagen and elastin fibres, which are essential for the formation and strengthening of the skin's natural framework.

VENOME PEN

Venome Pen Ultima A6-S is a device designed to perform micro-needle mesotherapy treatments with the use of carefully selected cartridges and adjustable skin perforation depth.

Venome Pen is the perfect tool in the fight against wrinkles, acne scars, pigmentation or stretch marks. The device can operate in both wired and wireless mode, offering great flexibility.

SET INCLUDES:

- Venome Pen Ultima A6-S device
- 2 pcs of Lithium-ion batteries (500 mah)
- Wired operation module
- Charger
- 2 pcs of 16PIN cartridges
- Power supply + cable

Needle extension range: 0.25 - 2.5 mm

Puncture speed: 22,000 punctures per minute

Wireless working time up to 8 hours

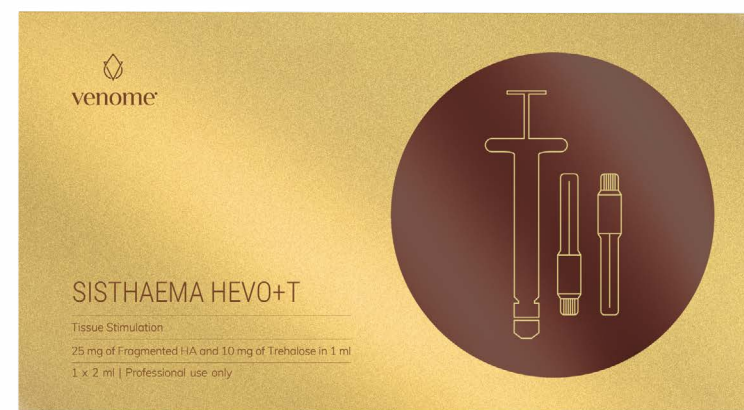

SISTHAEMA HEVO T

VENOME SISTHAEMA HEVO T

Venome SISTHAEMA is a unique aesthetic medicine solution that combines a synergistic action between a filler and a stimulating booster. The composition of the product allows to provide multiple treatment aspects, thanks to its unique ability to activate strong tissue fibroplasia, thus increasing the amount of type III collagen fibers and improving skin hydration by raising GAG levels.

Venome Sisthaema is a hydrogel for intradermal injections, with a breakthrough and patented formulation containing 70 mg of active ingredients, such as 50 mg of fragmented hyaluronic acid, and 20 mg of trehalose, with proven longer tissue retention, compared to other stimulant formulations. The product has a Class III medical certificate.

TRYCHO

A **concentrated treatment** to revitalize hair bulbs.

VENOME TRYCHO HAIR FILLER 2ML

Venome Trycho Hair Filler is an expert product which uniquely combines hyaluronic acid, growth factors and biomimetic peptides to effectively eliminate the problem of weak and thinning hair by stimulating the revitalization of hair bulbs and restoration of healthy hair shafts. A carefully selected combination of ingredients boosts cellular activity, stimulates cell division and accelerates microcirculation in the scalp.

VENOME HAIR FILLER 2.0 5ML

The innovative product **Venome Trycho Hair Filler 2.0** is a unique combination of **hyaluronic acid, hydrolyzed keratin, growth factors and biomimetic peptides** to effectively eliminate the problem of weak and thinning hair by stimulating the revitalization of hair bulbs and restoration of healthy hair shafts.

A carefully selected combination of ingredients boosts cellular activity, stimulates cell division and accelerates microcirculation in the scalp.

LIPO

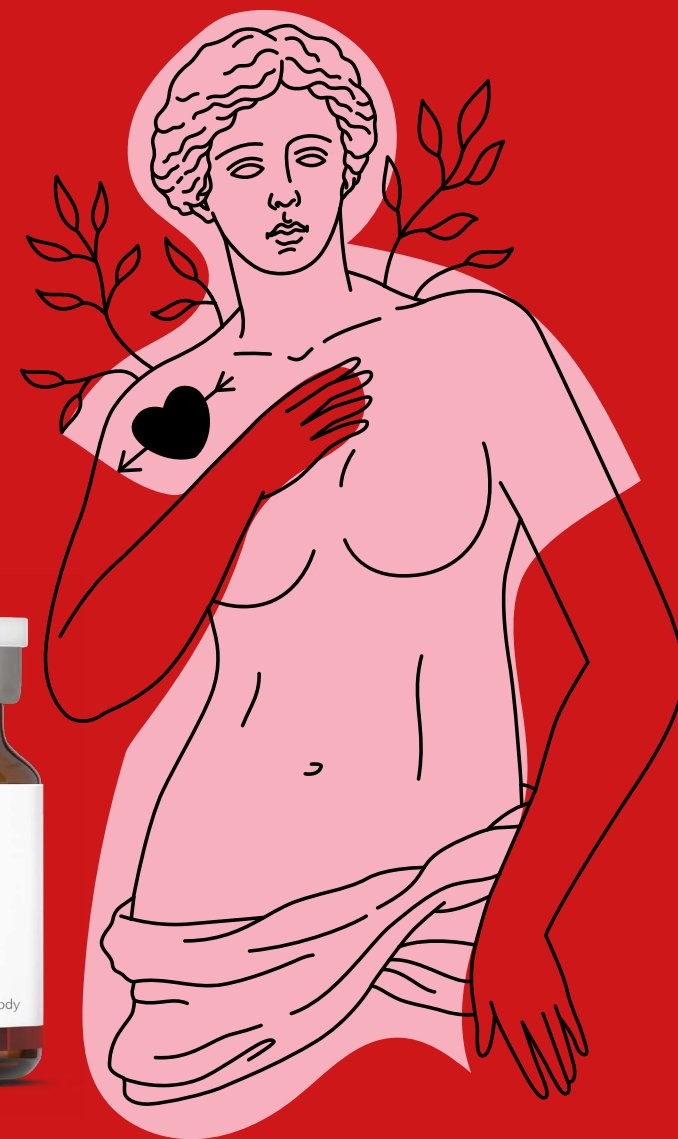

Help in combating difficult to remove fat deposits and zonal modeling of the figure and face.

VENOME LIPO SLIM 10ML

HELP IN TACKLING STUBBORN FAT DEPOSITS

Venome Lipo Slim is a two-ingredient product that provides a synergistic combination of two lipolysis activators: phosphatidylcholine and deoxycholic acid.

The product contains active ingredients in high concentrations, making it one of the most effective lipolytic treatments for combating stubborn excessive fat deposits.

PEEL

Venome PEEL is a range of **4 peelings** with different indications and concentrations.

VENOME MANDELIC GLOW 6ML

YEAR-ROUND REVITALIZATION OF THE SKIN

Venome Mandelic Glow is a chemical peel which enables you to safely address multiple skin problems. The product contains 40% mandelic acid, which is a fruit acid, or alpha hydroxy acid (AHA), that boosts the process of cellular regeneration, stimulates fibroblasts to produce protein fibers, and demonstrates strong bacteriostatic properties.

The product does not cause photosensitivity, and can therefore be used all year long.

VENOME LACTIC HYDRATION 6ML

HYDRATION AND TISSUE STIMULATION

Venome Lactic Hydration chemical peel is a revitalizing treatment which strengthens the skin's natural protective barrier, directly increasing the amount of ceramides, and thus making the skin more hydrated and its lipid barrier — stronger.

A unique combination of lactic acid, three amino acids, allantoin and ascorbic acid stimulates skin cells, improves skin quality and the structure of its superficial layers, making it toned and lifted.

VENOME TCA LIFT 5ML

ANTI-AGE THERAPY WITH TCA

Venome TCA Lift is a medical chemical peel intended for intense skin revitalization. It can be used for a variety of indications and offers a high safety profile.

The formula of the product is a combination of 20% trichloroacetic (TCA), kojic and mandelic acids that effectively eliminates signs of aging by stimulating fibroblasts to produce collagen and elastin fibers. It also demonstrates bacteriostatic activity and reduces the appearance of any discolorations and local hyperpigmentation. The product does not cause photosensitivity, so it can be used all year long.

CONTRAINDICATIONS FOR USE **VENOME TCA LIFT**

- ✓ Do not use in case of skin diseases and/or infection (dermatitis, herpes).
- ✓ Do not use if the patient is sensitive to one or more components; we recommend testing the product on an area of the body (e.g. forearm skin, skin behind the ear) to check how the skin of each patient reacts.
- ✓ Do not use during pregnancy or breastfeeding.
- ✓ Do not use on children under 12 years of age.

SIDE EFFECTS **VENOME TCA LIFT**

- ✓ Slight reddening of the treated areas, which goes away within 24-48 hours.
- ✓ After the peel, the skin may become drier.
- ✓ Discontinue use in case of sensitivity or irritation.

PROFFESIONAL USE ONLY

VENOME RETINOL C SHOT (2 TREATMENT SETS)

TWO-STAGE SKIN REGENERATION

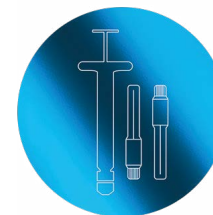

With its regenerating and rejuvenating properties, the RETINOL C SHOT exfoliating treatment restores skin firmness, minimizes the appearance of wrinkles, and eliminates local discolorations. The treatment involves the application of two products: the ampoule with the VITAMIN C SHOT serum and the RETINOL SHOT mask, which work together to intensify and accelerate the process of cell renewal, additionally purifying the skin and minimizing large pores. After the treatment, the skin is firm, bright, and glowing.

VITAMIN C SHOT

+ RETINOL SHOT

= RETINOL C SHOT

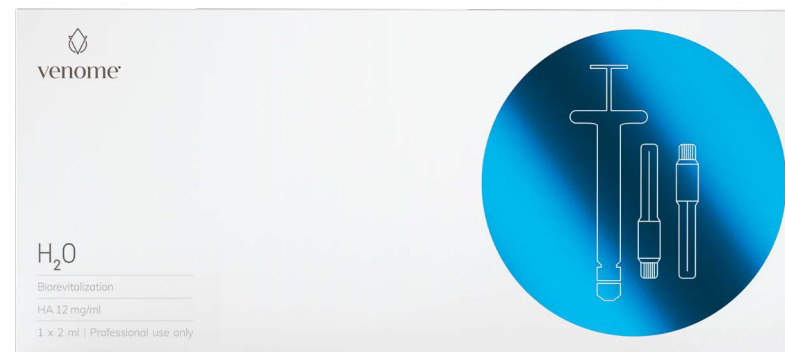

BIOREVITALIZATION

VENOME H₂O

A POWERFUL WAY TO STIMULATE TISSUE
RENEWAL AND IMPROVE HYDRATION

24 MG

OF FRAGMENTED
HYALURONIC ACID

Venome H₂O — an innovative **stimulating treatment** based on **fragmented, high molecular weight hyaluronic acid** at a **24 mg** concentration, which has exceptional **regenerating** properties and helps restore **volume** and **hydrate** tissues.

THE PRODUCT HAS A CLASS III MEDICAL CERTIFICATE.

The product improves **water balance** in the extracellular matrix and **stimulates** fibroblasts to intensively produce new protein fibers in the skin, which means it can restore its density and firmness.

Venome H₂O is based on innovative **fragmented hyaluronic acid with exceptional stimulating properties**: it can effectively activate the **CD44** receptor on fibroblasts, which results in accelerated metabolism and improved cell performance. The CD44 protein is one of the **main receptors** for hyaluronic acid and can be found on the **surface** of fibroblasts. It is truly unique, as it can **control** and **transmit the right signals** inside the cell, contributing to its **quicker growth**, proliferation, and intense production of type III **collagen** — also known as “young collagen”. Regular **high molecular weight hyaluronic acid** **cannot** stimulate fibroblasts and can only help restore skin hydration.

SOFT TOUCH MANUFACTURING TECHNOLOGY

During the **manufacturing process**, the **SOFT TOUCH** technology allows for isolating hyaluronic acid of the **size** that is the best at **stimulating** cells in the **dermis**. This is why Venome H₂O demonstrates powerful action in terms of stimulating fibroblasts — **perfectly selected hyaluronic acid** weights have the **power** to activate **CD44 receptors**. To determine the right amount of hyaluronic acid **monomers**, the **SOFT TOUCH** technology leverages innovative **FTIR spectroscopy**, in which infrared radiation is used to analyze particles. Owing to the use of the pharmaceutical spectroscopy method, Venome H₂O contains only **acid fragments** between 20 and 40 base units.

ACTION

Revitalizing H₂O gel effectively **reduces skin aging symptoms** by improving skin hydration, which helps restore a healthy environment for fibroblasts to work. Owing to the use of hyaluronic acid fragments with the capacity to **activate CD44 receptors**, new collagen fibers are produced much more quickly, which in turn helps the skin recover its firmness and **density**. As a result, its structure improves and **persistent** and expression wrinkles are **minimized**.

INDICATIONS

- ✓ Visibly loose skin;
- ✓ Loss of hydration;
- ✓ Persistent wrinkles;
- ✓ Prominent jowls;
- ✓ Loss of skin elasticity;
- ✓ Lack of glow.

CONTRAINDICATIONS AND SIDE EFFECTS VENOME H₂O

CONTRAINDICATIONS

Venome Biorevitalization H₂O is contraindicated in case of:

- ✓ Allergy to hyaluronic acid;
- ✓ Auto-immune disease or during immunotherapy;
- ✓ Acute skin infection in the area to be treated (e.G. Acne);
- ✓ Acute influenza and feverish cold;
- ✓ Acute systemic infection (herpes, psoriasis);
- ✓ Coagulation disorder;
- ✓ A tendency to form scars;
- ✓ Pregnancy or breast-feeding;
- ✓ People under age of 18.

VENOME BIOREVITALIZATION H₂O MUST NOT BE INJECTED INTO:

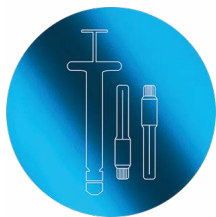

- ✓ Blood vessels;
- ✓ Bone joints;
- ✓ Breasts.

SIDE EFFECTS

Immediately after treatment, injection related reactions like redness and swelling and in rare cases itching or bruising may be observed at the injection sites. Allergic reactions are extremely rare because Venome Biorevitalization H₂O is protein free due to the non-animal source. Injection-related reactions will dissolve spontaneously within a short while.

In case of an inflammatory reaction it is recommended that the patient visit the physician.

In literature, individual cases of granuloma, abscesses, discolouration and necrosis have been described.

FILLER

FILLER LIDOCAINE

Venome Filler is a range of five tissue fillers, in two versions: with and without lidocaine, containing monophasic, non-animal, cross-linked hyaluronic acid obtained using bio-fermentation technology. Each Venome product consists of a different amount of sodium hyaluronate and a cross-linking agent, which allows you to find the product perfectly matching both the indication and the desired scope of correction. Whether your goal is to hydrate and revitalize skin, eliminate fine or medium wrinkles, add volume, reshape parts of the face or enhance a client's lips — the Venome products are just what you are looking for.

VENOME FILLER S LIPS 2X1ML **HYDRATES AND SUBTLY ENHANCES LIPS**

The product contains **14 mg/ml** of monophasic, cross-linked hyaluronic acid in the form of viscoelastic gel.

VENOME FILLER S 2X1ML **REMOVES FINE AND MEDIUM WRINKLES**

The product contains **16 mg/ml** of monophasic, cross-linked hyaluronic acid in the form of viscoelastic gel.

VENOME FILLER M 2X1ML

REMOVES MEDIUM AND DEEP LINES, INCREASES SKIN ELASTICITY, ELIMINATES SAGGING

The product contains **20 mg/ml** of monophasic, cross-linked hyaluronic acid in the form of viscoelastic gel.

VENOME FILLER L 2X1ML

VOLUME RESTORATION – SHAPING AND ENHANCING NATURAL BEAUTY

The product contains **24 mg/ml** of monophasic, cross-linked hyaluronic acid in the form of viscoelastic gel.

VENOME FILLER L LIPS 2X1ML

PERFECTLY FILLED LIPS WITH A DEFINED CUPID'S BOW

The product contains **20 mg/ml** of monophasic, cross-linked hyaluronic acid in the form of viscoelastic gel.

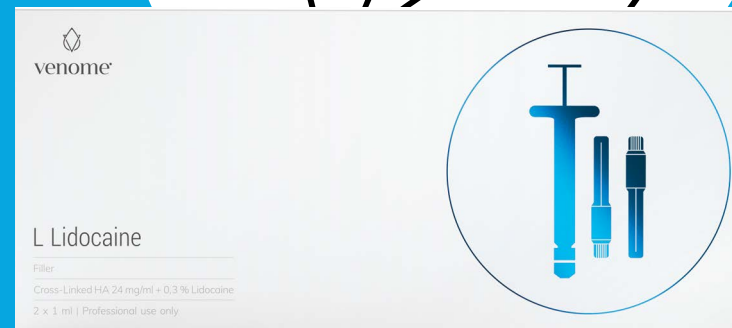

VENOME XXL 1ML

STRONG CONTOUR ENHANCEMENT AND REPLENISHMENT OF TISSUE DEFECTS

Cross-linked hyaluronic acid gel Venome Filler XXL is ideal for facial contouring and correction of significant tissue defects and scars, thanks to its suitable plasticity and exceptional rheological properties.

The product, in the form of a homogeneous gel, provides the appropriate volume and firmness with a high degree of cohesion and softness of the correction. Thanks to its elastic structure and the hydration technology used in the hyaluronic acid formula, the filler effectively corrects deep defects, reducing the risk of asymmetry as well as the amount of post-procedure swelling.

VENOME FILLER AND FILLER LIDOCAINE

IS CONTRAINDICATED IN CASE OF:

- ✓ allergy to hyaluronic acid
- ✓ auto-immune disease or during immunotherapy
- ✓ acute skin infection in the area to be treated (e.g. acne)
- ✓ acute influenza and feverish cold
- ✓ acute systemic infection (herpes, psoriasis)
- ✓ coagulation disorder
- ✓ a tendency to form scars
- ✓ pregnancy or breast-feeding
- ✓ people under age of 18

VENOME FILLER AND FILLER LIDOCAINE MUST NOT BE INJECTED INTO:

- ✓ blood vessels
- ✓ joints
- ✓ breasts

NOT RECOMMENDED FOR TREATMENT OF:

- ✗ orbita and front head lines

VENOME FILLER SIDE EFFECTS

Immediately after treatment, injection related reactions like redness and swelling and in rare cases itching or bruising may be observed at the injection site(s).

The day after a pronounced swelling may occur but this will resolve spontaneously within 3-5 days. Allergic reactions are extremely rare, because Venome Filler is protein free due to the non-animal source.

Rarely, formation of nodules or oedema may occur at the injection site. In case of an inflammatory reaction it is recommended that the patient visits the physician.

In the literature for filler materials based on hyaluronic acid, individual cases of granuloma, abscesses, delayed hypersensitivity reactions and discolouration have been reported. Furthermore in literature, other very rare individual cases of necrosis have been described, due to injection into arterial vessels or occlusion by the filler pressing against the arterial wall.

VENOME FILLER LIDOCAINE SIDE EFFECTS

Immediately after treatment, injection related reactions like redness and swelling and in rare cases itching or bruising may be observed at the injection site(s). The day after, a pronounced swelling may occur but this will resolve spontaneously within 3-7 days. Allergic reactions in the form of urticaria, oedema, bronchospasm, anaphylactic reactions/ shocks (i.e. acute respiratory distress syndrome, cardiovascular system reactions) are extremely rare, because Venome Filler Lidocaine is protein free due to the non-animal source.

Rarely, formation of nodules or oedema may occur at the injection site. In case of an inflammatory reaction it is recommended that the patient visits the physician.

Literature on hyaluronic acid based filler materials reports individual cases of granuloma, abscesses, delayed hypersensitivity reactions and discolouration. Other rare side effects found in the literature are necrosis caused by vessel occlusion. These are caused by the injection of the filler material into vessels causing occlusion, or when the filler material presses against the arterial wall. Injection of lidocaine may cause a local redness or hypersensitivity reaction.

PROFFESIONAL USE ONLY

AUTOLOGIC

Professional kit for complete **PRP treatment**.

VENOME FULL PRP KIT

A full-fledged kit for the procedure with the use of platelet-rich plasma.

CONTRAINDICATIONS TO USE **VENOME FULL PRP KIT**

The kit is used to professionally perform a procedure using platelet rich plasma. Platelet rich plasma PRP (Platelet Rich Plasma) is an autologous therapy using natural mechanisms of skin regeneration. During the procedure, growth factors such as transforming growth factor (TGF), platelet-derived growth factor (PDGF), fibroblast growth factor (FGF), insulin-like growth factor (IGF), vascular endothelial growth factor (VEGF), epithelial growth factor are released. (EGF).

CONTRAINDICATIONS FOR THE PROCEDURE

- ✗ pregnancy and breast-feeding
- ✗ viral infections
- ✗ blood coagulation disorders
- ✗ taking anticoagulants
- ✗ liver disease
- ✗ blood diseases
- ✗ critical thrombocytopenia
- ✗ cancers
- ✗ platelet dysfunction syndromes
- ✗ hemodynamic instability
- ✗ acute disease states resulting from autoimmune disease

**MEDICAL DEVICE FOR EXTERNAL USE,
TO BE USED BY MEDICAL PROFESSIONALS ONLY.**

COSMECEUTICALS

Versatile, multi-dimensional everyday skin care. Relief for your skin.
A moment for you. Courtesy of Venome. Recommended for all skin types.

VENOME UNIQUE CREAM

Venome Unique Cream — a versatile and light **concentrated nourishing cream** that helps **restore the hydrolipidic barrier**, providing a long-lasting **moisturizing effect** and protection, crucial for counteracting and reducing visible skin aging signs.

The unique formula of the product, based on ingredients that **eliminate NMF deficiency, as well as cholesterol**, and **musk rose oil**, effectively **soothes irritations** and reduces erythema and redness.

Unique Cream contains highly concentrated **musk rose oil**, which is rich in **essential fatty acids** (linoleic acid and alpha-linolenic acid) — the **components of cellular cement** that help improve **hydrolipidic balance** and protect the skin against transepidermal water loss (TEWL), leaving it deeply hydrated, soft, and smooth. What is more, rose oil is rich in **antioxidants as well as vitamins E, C and A**, and thus effectively **counteracts**

free radicals, slowing down the progression of skin aging and boosting tissue regeneration processes, which in turn makes the skin more firm and supple. The combination of **hyaluronic acid** and **squalene** intensely moisturizes the epidermis and protects it against adverse environmental factors.

The product also contains **cholesterol**, which is naturally found in **human skin lipids**, and thus effectively **strengthens the integrity of the epidermis** and takes part in the **restoration of the hydrolipidic barrier**. Over time, the amount of cholesterol in our bodies goes down, which causes the skin to become drier and more prone to irritations. This is why it is vital to eliminate the **deficiency** of this ingredient through proper **daily skin care routine**.

VENOME ACID & C SERUM

Venome Acid & C Serum — intensely **regenerating nourishing complex** with antioxidant and **anti-aging** ingredients, synergistically supporting natural regeneration and **stimulation**, which helps make the skin **denser** and firmer. With its **velvety texture**, the **serum** absorbs quickly, leaving the skin radiant and moisturized.

The serum contains **an innovative form of vitamin C at the highest, 20% concentration**. This form of vitamin C is the most efficient, highly stable, and does not cause irritation.

Furthermore, it can **effectively** penetrate the epidermis. Vitamin C is an extremely **important** component for the **production of new collagen fibers**, which is why it is crucial to ensure its adequate daily supply. Owing to the use of ethyl ascorbic acid, the product can stay in the skin **longer**, boosting its **regenerative potential** and ensuring better protection. Regularly used over longer periods of time, the product helps the skin restore the right density and firmness.

Owing to the content of **ferulic acid**, with extremely powerful antioxidant properties and the capacity to reduce discoloration, the product **inhibits tyrosinase activity**, helping reduce **hyperpigmentation** and giving the skin an **even tone**. Ferulic acid also effectively minimizes the amount of free radicals which are responsible for damaging protein structures. The product also demonstrates **anti-inflammatory potential**, accelerating healing processes in the skin.
